Warm-up Questions

Notes

Example: Suppose $f(x) = \frac{2x-1}{3x+5}$. What is $f^{-1}(-7)$?

Example: Suppose $f(x) = \frac{2x-1}{3x+5}$. What is $f^{-1}(x)$?

End of Class

Write a summary of what you learned today:

What questions do you have about the material from today?

What do you need to do between now and the next class meeting?
